

# Weekend Sewing Errata

## Flower Girl Dress

The bodice on this dress is meant to fit comfortably but snugly against the wearers chest. In order to ensure a perfect fit, follow the instructions at right to customize your pattern piece.

To make this dress easier to put on and take off, do not attach straps to the back of the dress. Instead, use sew on snaps or buttons to make them detachable.

## Summer Blouse

The "sleeve" pattern piece for this project is missing markings. There should have been dots indicating where to begin and end basting stitches along the edge at the shoulder.

Basting stitches should be placed along the curve that will become your shoulder, starting and ending about three inches from each corner.

## Everything Tote Bag

There is an error in the materials list for this project. You will need 1 yard each of the main and lining fabrics, not 1/2 yard.

## Yard Sale Skirt

This skirt requires the joining of at least six panels, not five. For size 10-14, add two panels. For sizes 16-20, add four panels. For each panel added, make the waistband ties eight inches longer. Once your panels have been joined, test them by wrapping them around your waist. Then do the same with your waistband. Then attach your waistband to your skirt.

## Trapeze Sun Dress

In the photo for this project, the dress has a center pleat on its front. The pattern and instructions call for two pleats on the front of the dress. Follow the pattern as it is written or try making a center pleat, which will also work well and be more flattering on a more busty figure.

## Pajama Pants for Everyone

The fabric requirements and layout diagram will work only for the smaller sizes. If you are making the adult size medium or large, you will need 2 1/2 yards of fabric, not 2 1/4 as listed.
